

Derrick Holleman

Minneapolis, MN | (612) 418-5274 | derrickholleman@gmail.com

Full Stack Software Engineer

[Portfolio Website](#) | [GitHub](#) | [LinkedIn](#)

Full Stack Software Engineer proficient in using JavaScript, CSS, React, Express, PostgreSQL, and Node.js to develop user-centric web and mobile applications. Excited to bring a passion for problem-solving and a proven record of strong collaboration to immediately add value to an agile-focused team.

SKILLS

Front-end: HTML, CSS, Javascript, React, Tailwind, Bootstrap

Back-end: Node.js, Knex, Express, PostgreSQL, MongoDB

Concepts & Tools: Git, Heroku, Unit Testing, RESTful APIs, Docker, Agile Development

SOFTWARE ENGINEERING EXPERIENCE

Software Engineer Apprentice

Remote

Thinkful

September 2021 - January 2022

- Designed mobile-first full-stack applications from conception to deployment.
- Learned industry best practices during lectures with working software engineers.
- Collaborated with fellow students daily and mentored students who were struggling in the course.

Blackjack Game | Javascript, CSS, HTML. Hosted on Netlify

[Live](#) | [GitHub Repo](#)

- Developed a blackjack game to test the player's luck against a random number generator. The player can choose a custom username and is prompted to start a new game after going below 0 points.
- Implemented code with complex logic while neatly keeping track of data through readable functions.
- Created responsive styling from scratch using CSS.

Flash Cards App | React, JSON server, Bootstrap, Docker

[Live](#) | [Front-end](#) | [Back-end](#)

- Designed a flash cards app with full CRUD functionality to help users stay organized and study.
- Configured a Docker file so that the project can be run in any development environment.
- Hosted the client on Vercel and the server on Heroku as a workaround for the JSON-server API.

Hatchways Filter Challenge | React, CSS. Hosted on Netlify

[Live](#) | [GitHub Repo](#)

- Created a scrollable card in which student data is fetched from an API and made into a list.
- Students can have tags added to them and the list can be filtered by full name and/or tag.

ADDITIONAL EXPERIENCE

Web Developer

Minneapolis, MN

DH Development

March 2021 - Present

- Developed applications and designed web pages for clients to fit their requirements.
- Contributed to open source projects, some used by thousands of users.
- Worked with a variety of front-end technologies depending on the needs of the project.

Maintenance Associate

Brooklyn Park, MN

SuperValu

June 2014 - December 2019

- Listened and responded to managerial and customer requests regarding store operations.
- Worked in a fast-paced environment where speed and accuracy separated great and average employees.

EDUCATION

Certificate, Software Engineering

Remote

Thinkful

September 2021 - January 2022

Bachelor of Arts, Music Performance

Minneapolis, MN

Augsburg University

January 2018 - May 2019

Music Performance

St. Paul, MN

McNally Smith College of Music (school closed December 2017)

September 2014 - December 2017
